

IBRAHIM BAIG

Full-Stack & AI Engineer | Python Automation,
LLMs

I build production-ready web products end-to-end with a focus on scalable backend architecture, high-performance React interfaces, and practical AI integration. I develop NestJS/TypeScript systems and ship features for real users. As a freelancer, I build Python automation and Telegram bots for data-heavy workflows.

SKILLS

- Solidity
- The Graph
- Ethers.js
- Solana Web3.js,
- LLM Fine-tuning (LoRA/PEFT)
- Prompt Engineering
- Workflow Automation
- JavaScript
- TypeScript
- Python
- NestJS
- Node.js
- React

EXPERIENCE

Hashcore – Full-Stack Developer (Aug 2024 – Present)

- Built and maintained modular NestJS + TypeScript backend services for production workloads.
- Engineered backend systems for Pumpkin.fun, improving reliability, performance, and maintainability.
- Integrated AI workflows using fine-tuned open-source LLMs (LoRA/PEFT) for automation/content tasks.

Freelance – Python Telegram Bot Developer

- Delivered custom Telegram bots for token tracking, posting automation, and migration/status monitoring.
- Implemented queueing/scheduling workflows and database-backed task processing for reliability.
- Maintained production bots with iterative enhancements, debugging, and deployment support.

PROJECTS

- **Pumpkin.fun** — Solana fair-launch platform backend focused on speed, stability, and secure operations.
- **Pumpkin Revenue & Moderation Suite** — revenue comparison tool + admin moderation dashboard.
- **@pumpchartsbot / @pumpmigrationsbot / @pumppostsbot** — Telegram automation bots for token analytics and alerts.

EDUCATION

Chapter And Verse Schooling System

O & A Level | Commerce
June 2022 - 2023
